QOSTODIAN RECON

Sensitive data discovery and classification
that never leaves your infrastructure

Unstructured sensitive data you can't see is a risk you can't manage. Qostodian Recon is on-premises sensitive data discovery and classification: it finds that data, classifies it and lets you act on it, entirely inside your own infrastructure.

With Qostodian Recon, your data never leaves your boundary. No file copies are sent to a vendor cloud, no agents to manage, and it can run fully air-gapped.

10–50x
faster answers than the prior tool

1 day
to install, with first results

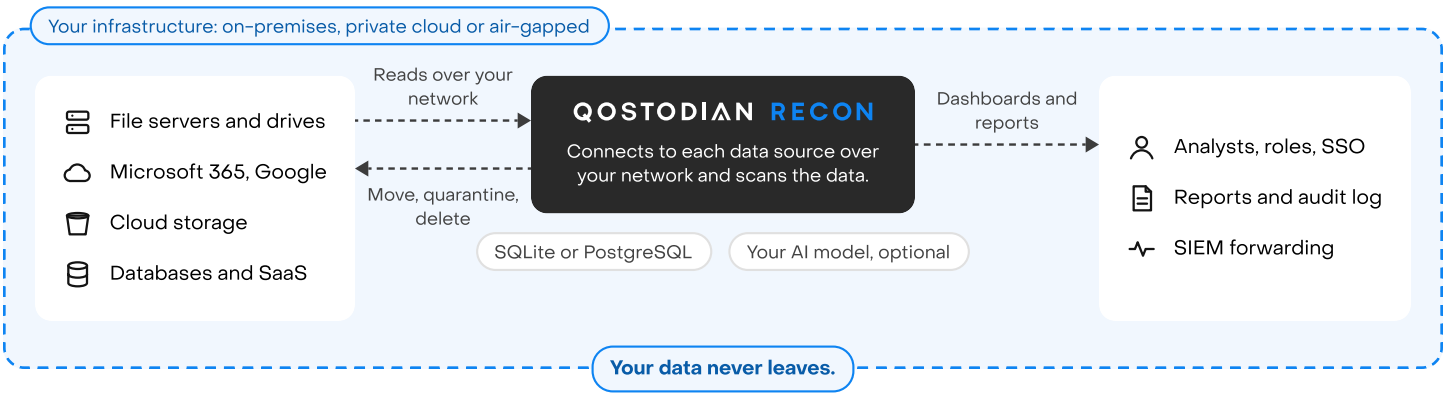

350+
file types, even images

Canadian, U.S. and European regulations

Scans a wide range of data sources

SharePoint · OneDrive · Exchange · File servers · Network drives · Local drives · AWS S3 · Azure Storage
Google Drive · Google Cloud · SQL Server · Oracle · PostgreSQL · MySQL · Salesforce · and more

How it works: your data stays inside your infrastructure

Outcomes for every stakeholder

One inventory serves security, privacy, legal and IT, from discovery to remediation.

FOR THE CIO AND CISO

Sensitive data inventory

See where sensitive data sits across every repository, without it leaving your network.

FOR PRIVACY AND COMPLIANCE

Audits and compliance

Findings mapped to Canadian, U.S. and European regulations, every action logged.

FOR IT AND FINANCE

Data cleanup and migration

Remove duplicate and obsolete sensitive files before you migrate, to cut risk and storage.

FOR LEGAL

Post-breach analysis

Scope what sensitive data a breach exposed, to size notification and liability fast.

Mapped to the regulations you answer to

REGULATION	WHO IT SERVES	HOW QOSTODIAN RECON HELPS
GDPR (EU)	Privacy, legal	Finds personal data in EU formats; evidence for access and erasure.
HIPAA (U.S.)	Compliance, CISO	Detects health information; every user action is in the audit log.
PCI DSS	CISO, IT	Finds card numbers with checksum checks; quarantine or delete them.
CCPA, NY SHIELD (U.S.)	Privacy, legal	Inventories personal information for access and deletion requests.
GLBA, SEC, FINRA (U.S.)	Compliance	Detects financial account data; logs every remediation action.
PIPEDA, Quebec Law 25	Privacy, legal	Detects Canadian personal identifiers; evidence for access and deletion.
OSFI B-13 (Canada)	CISO, compliance	Classifies sensitive data and logs every action for risk reviews.

Customer results

1 day

to install, with first results, versus 3 months for the previous tool

"It takes less time to install, less time and money to maintain, and yet scans 10x faster."

Head of Information Security, Insurer

90 to 15 min

per compliance task, and scans now run weekly

"We now quickly generate an audit-ready report to provide to regulators."

Director of IT, Investment Fund Manager

Under 6 hours

to scan several terabytes, where existing tools took days

"We quickly sorted through thousands of records and weeded out false positives."

Associate Director, Higher Education

Qohash secures the sensitive data your AI and your people reach: on file servers, laptops, collaboration platforms and in the flow of AI requests. With Qohash, your data is never exported, copied or moved to be analyzed. Security comes to the data, for regulated, public and defence organizations.
